

PUBLIC NOTICE

Effective until November 30, 2023

The Water Security Agency will be completing upgrades to the Christopher Lake Outlet Structure on Bay Drive in the Village of Christopher Lake during late summer and fall 2023. The scope of work will include replacement of the intake structure, installation of vehicle guardrails on the roadway, and various other safety and operational improvements.

During construction, road access across the structure will be limited at times to one lane traffic. A temporary cofferdam will be placed in the channel upstream of the structure to facilitate construction.

Work will be complete prior to onset of winter 2023.
